

Unilong Industry Co., Ltd

Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China
Contact: +86-18653132120

Product name:1,3-Bis(aminomethyl)benzene

CAS:1477-55-0

Molecular Weight:136.19

Product Name	1,3-Bis(aminomethyl)benzene
CAS	1477-55-0
Appearance	Colorless liquid
Melting point	14° C
Flashing point	>230 ° F
Application	Epoxy curing agent

Application:

1,3-Bis (aminomethyl) benzene is mainly used in the production of epoxy resin curing agents, photosensitive plastics, rubber additives, polyurethane resins, and coatings; It is mainly used to manufacture high-performance epoxy resin curing agents that are heat-resistant, non-toxic, suitable for underwater construction, and can be quickly cured by heating. It is a raw material for polyurethane resin and synthetic functional epoxy resin. It is also used as a rubber additive, photosensitive plastic, pesticide, coating, nylon product, fiber finishing agent, rust inhibitor, chelating agent, lubricant, paper processing and other applications.

Package:

Usually packed in 25kg/drum,and also can be do customized package.
