

TECHNICAL DATA SHEET

Product Laurocapram
Chemical Name n0252;acecloguanosine;N-Dodecyl Nitrogen Heterocyclic Heptane-2-Ketone;Laucapram;Azone,
Laurocapram;DODECYLAZACYCLOHEPTAN-2-ONE;1-n-Dodecylazacycloneptan-2-one;1-Dodecylazacycloneptan-2-one
CAS 59227-89-3
Chemical Formula C₁₈H₃₅NO
EINECS Number 261-668-9
Molecular structure

SPECIFICATION :

ITEM	STANDARD LIMITS
Appearance	Color Colorless to yellowish liquid
Density	0.906-0.926
Melting point	-7°
Boiling point	bp50m 160°

Packaging :

25kgs drum or pack as customer requirements.

Application:

1. Used as a penetrating agent for various creams and hair products in cosmetics;
2. Used as an enhancer for topical medication application and massage;
3. Used for pesticides, as a growth regulator for plants, a suction promoting agent, and a penetration promoting agent for fungicides and insecticides;
4. A coloring promoter used in the fields of leather and printing and dyeing
