Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China
Contact: +86-18653132120

Product name: Tranexamic acid

CAS: 701-54-2

Molecular Weight: 157.21

Item	Specification
Boiling point	300.2 ± 15.0 ° C(Predicted)
Melting point	233 ° C
Density	1.095 ± 0.06 g/cm ³ (Predicted)
pKa	4.65 ± 0.10(Predicted)
solubility	Slightly soluble in water
Storage conditions	Keep in dark place

Application:

Tranexamic acid not only has a stabilizing effect on fibrin, but also has the ability to inhibit protein degradation into vasoactive peptides, ultimately reducing capillary permeability and increasing its resistance to vascular fragility. In addition, tranexamic acid can also achieve anti allergic and anti-inflammatory effects by inhibiting the production of peptides and other active peptides that cause increased vascular permeability, allergic reactions, and inflammatory lesions. It can also increase collagen synthesis in fibrin clots, thereby increasing the strength and stability of the clots and reducing bleeding.

Unilong Industry Co., Ltd

Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China
Contact: +86-18653132120

Package:

Usually packed in 25kg/drum,and also can be do customized package.
