**Product name:DL-3-Hydroxybutyric acid sodium salt**

**CAS:150-83-4**

**Molecular Weight:126.09**

Item	Specification
MW	126.09
Purity	98%
Stability	Hygroscopicity
Storage conditions	2-8°C
Melting point	167-170 °C

## Application:

DL-3-Hydroxybutyric acid sodium salt is mainly prepared by biochemical or fermentation methods, resulting in low yield, high cost, and high price, which hinders the research, development, and application promotion of biodegradable plastics. Sodium 3-hydroxybutoxide can be directly used to produce aliphatic polyester plastics, or it can be copolymerized with other compounds to produce high-performance plastics.

## Package:

Usually packed in 25kg/drum, and also can be do customized package.
