**Product name: Calcium Thiosulphate**

**CAS: 10124-41-1**

**Molecular weight: 156.23**

Item	Standard
Fusing point	decomposes [CRC10]
Density	1.870
Cadmium	≤1ppm
Insolubles	≤0.02%
Fe	≤0.01
Specific Gravity	1.21-1.24

---

### **Application:**

Calcium Thiosulphate may be blended with other fertilizers, or applied as a foliar treatment on selected crops. When used as a foliar fertilizer, CaTs should first be diluted with water before applying. CaTs may be applied to a wide variety of crops. The calcium requirement for most crops increases during periods of rapid growth and early fruit development. CaTs is an effective water-soluble source of calcium and thiosulfate sulfur which aids in the correction of these nutrient deficiencies in crops. CaTs may be used as a fertilizer and as a soil amendment. As a soil amendment, CaTs may be used to improve water infiltration and aid in the leaching of harmful soil salts.

### **Package:**

250KG plastic drum or IBC or pack according to the customer's requirement.
