## **Application:**

2-phenoxyethyl acrylate has shown a wide range of uses. First of all, in the field of chemical industry, it can be used as a monomer of polymer materials, and polymers with special properties are prepared by polymerization reaction. These polymers are widely used in coatings, inks, adhesives and other fields. In addition, 2-phenoxyethyl acrylate can also be used to prepare surfactants, lubricants and so on. In the field of medicine, 2-phenoxyethyl acrylate is used as the precursor or intermediate of drug synthesis to prepare drug molecules with specific pharmacological activity.
