Product name: Hydrogen tetrachloroaurate(III) trihydrate

CAS: 16961-25-4

Molecular weight: 357.79

Item	Standard
Melting point	30°C
Water solubility	Soluble in water. Insoluble in ether.
Density	3.9 g/cm ³ (20°C)
Appearance	Yellow solid

Application:

Hydrogen tetrachloroaurate(III) trihydrate can be used to manufacture a colorimetric aptamer sensor for Staphylococcus aureus. Hydrogen tetrachloroaurate(III) trihydrate is used as an analytical reagent for microanalysis of rubidium and cesium and measurement of alkaloid composition, etc. It can also be used in the manufacture of red glass, electroplating and photography. Hydrogen tetrachloroaurate(III) trihydrate can also be used for local gold plating of semiconductor and integrated circuit lead frames, printed circuit boards, electronic connectors and other electrical contact elements.

Package:

25kg/drum or according to customer requirements.
