Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China
Contact: +86-18653132120

Product name: Iron hydroxide

CAS: 1309-33-7

Molecular weight: 106.87

Item	Standard
Solubility	Aqueous acid solution (slightly soluble)
Appearance	crystallization
Density	3.120

Application:

Iron hydroxide is an amorphous substance that can be used as a pigment, medicine, water purification agent, and as an antidote to arsenic. Iron hydroxide is used in paint, rubber, plastics, construction and other coloring, is an inorganic pigment, in the paint industry as an anti-rust pigment. Iron hydroxide is also used as a colorant and filler for rubber, artificial marble, floor terrazzo, plastics, asbestos, artificial leather, leather polishing paste, etc.

Package:

25kg/drum or according to customer requirements.
