Application:

Thaclear 3940 is a second generation sorbitol nucleating transparent agent that gives plastic products superior clarity, gloss and other mechanical properties. Thaclear 3940 nucleating transparent agent can improve the mechanical properties of the material. It is suitable for the production of plastic products, and is also widely used in the production of transparent polypropylene sheets and pipes. It can be used directly after dry mixing with polypropylene, and can also be made into 2.5~5% seed particles.

Package:

25kg/drum or according to customer requirements.
