Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China Contact: +86-18653132120

Product name: ZN-DTP

CAS: 68649-42-3

Molecular wight: 716.39

Item	Standard
Boiling point	120°C [at 101 325 Pa]
Density	1.113[at 20°ℂ]
Vapor pressure	0Pa at 25℃
Water solubility	Ong/L at 25 °C
LogP	14.88 at 25℃

Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China Contact: +86-18653132120

Application:

Zinc dialkyl dithiophosphate can be used as a light stabilizer, often used as a light stabilizer for polymers, rubber and coating materials, which can reduce the aging rate of materials in sunlight. Zinc dialkyl dithiophosphate, as an antioxidant and anti-wear agent, can effectively reduce the decomposition and deterioration of the material under long-term sunlight exposure, thereby extending the service life of the material. As a transition metal complex, zinc dialkyl dithiophosphate can also be used as a catalyst for some organic reactions, such as polymerization and esterification.

Package:

180kg/drum or according to customer requirements.
