

Unilong Industry Co., Ltd

Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China
Contact: +86-18653132120

Product name: 4-Methoxyphenol

CAS: 150-76-5

Molecular weight: 124.14

Item	Standard
Appearance	White crystalline flake
Hydroquinone(123-31-9) %	≤0.05
Hurning Residue%	≤0.01
Loss on Drying%	≤0.3
Melting Point °C	54-56.5
Heavy Metal%	≤0.001
APHA	≤10

Application:

4-Methoxyphenol is primarily used as a polymerization inhibitor, UV inhibitor, vinyl monomer dye intermediate, and as an antioxidant BHA for the synthesis of food fats and cosmetics. 4-Methoxyphenol is an important intermediate in fine chemical products such as medicine, perfume and pesticides. It can also be used as polymer corrosion inhibitor, anti-aging agent, plasticizer and so on. It is mainly used to produce allyl monomer polymerization inhibitors such as acrylonitrile, acrylic acid and its ester, methacrylic acid and its ester. It is also used in the synthesis of anti-aging agents, plasticizers and food additives (BHA). 4-Methoxyphenol is used as a solvent. Acrylic and acrylonitrile monomer polymerization inhibitors. Uv inhibitors. Make antioxidants. Dye preparation. 4-Methoxyphenol is used as a solvent. As a polymerization inhibitor of vinyl monomers; Uv inhibitor; Dye intermediate and antioxidant BHA(3-tert-butyl-4-hydroxyphenyl ether), used in synthetic cooking oils and cosmetics.

Package:

25kg/drum or according to customer requirements.
