**Product name: Methyl cellulose**

**CAS: 9004-67-5**

**Molecular weight: 454.50912**

Item	Standard
Melting point	290-305 °C
Density	1.01 g/cm <sup>3</sup> (Temp: 70 °C)
Form	powder
Colour	White, yellowish-white or off-white

### **Application:**

Methyl cellulose is used in mayonnaise, shortening, and some other foods. Because this product is not digested in the body, it can retain several times of water, causing satiety, and can be used in salting cookies, waffles and other curative foods. When using, wet the powder with about 1/5 of the water required, then add cold water (ice if necessary) and stir well. Methyl cellulose is used as thickener, stabilizer, emulsifier, excipient, dispersant, adhesive, and hydrosol substitute for film forming agent.

### **Package:**

25kg/drum or according to customer requirements.
