**Product name: Diisooctyl sebacate**

**CAS:27214-90-0**

**Molecular Weight:C26H50O4**

| Item               | Specification  |
|--------------------|----------------|
| boiling point      | 225 °C / 2mmHg |
| density            | 0,91 g/cm3     |
| purity             | 99%            |
| MW                 | 426.67         |
| Storage conditions | 2-8°C          |
| flash point        | 215°C          |

## Application:

Diisooctyl sebacate is an excellent low-temperature resistant plasticizer commonly used in the plasticizing application technology fields of polyvinyl chloride cable materials, cold resistant films, artificial leather, and other resins. At the same time, it also has an important use as a base oil for biomass based lubricants in Chemicalbook. Due to its high temperature resistance, low temperature resistance, and biodegradability, this base oil can be used as a base oil for jet engine lubricants.

## Package:

Usually packed in 25kg/drum, and also can be do customized package.
