Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China Contact: +86-18653132120

Product name: Fumaric acid

CAS: 110-17-8

Molecular Weight: 116.07

Item	Specification
Boiling point	137.07°C (rough estimate)
Density	1.62
Melting point	298-300 °C (subl.) (lit.)
flash point	230 °C
resistivity	1.5260 (estimate)
Storage conditions	Store below +30°C.

Application:

Fumaric acid is used to produce unsaturated polyester resin, which is characterized by good chemical corrosion resistance and heat resistance; The copolymer of fumaric acid and vinyl acetate is a good adhesive, and the copolymer of styrene is a raw material for manufacturing fiberglass. The plasticizer made from fumaric acid is non-toxic and can be used for vinyl acetate latex in contact with food.

Package:

Usually packed in 25kg/drum, and also can be do customized package.
