

Unilong Industry Co., Ltd

Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China
Contact: +86-18653132120

Product name: Triacetoneamine

CAS: 826-36-8

Molecular Weight: 155.24

Item	Specification
Boiling point	105-105°C/18mm
Density	0.9796 (rough estimate)
Melting point	59-61 °C
flash point	73°C
resistivity	1.4680 (estimate)
Storage conditions	2-8°C

Application:

Triacetoneamine, as the precursor of hindered amine light stabilizers, plays an important role in the development and production of hindered amine light stabilizers. Triacetoneamine is an intermediate for hindered amine light stabilizers and pharmaceutical intermediates. Triacetoneamine is the main intermediate for synthesizing hindered amine light stabilizers and also has photostability properties. It has important applications in the pharmaceutical industry.

Package:

Usually packed in 25kg/drum, and also can be do customized package.
