Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China Contact: +86-18653132120

Product name:Naphthalene-2-sulfonic acid

CAS:120-18-3

Molecular Weight: 208.23

Item	Specification
Boiling point	317.43°C (rough estimate)
Density	1.44 g/cm
Melting point	124 °C
Refractivity	1.4998 (estimate)
pKa	0.27±0.10(Predicted)
Storage conditions	Inert atmosphere,Room Temperature

Application:

Naphalene-2-sulfonic acid is an important chemical intermediate widely used in the dye, textile, and leather industries. Used for the production of dye intermediates such as 2-naphthol, 2-naphthol sulfonic acid, 1,3,6-naphthalene trisulfonic acid, 2-naphthylamine sulfonic acid, etc. Dehydrogenation catalyst. Reacting with formaldehyde can produce diffusion agent N (diffusion agent NNO). Naphthalene-2-sulfonic acid is also used as a biochemical reagent and experimental reagent for the determination of peptone and protein.

Package:

Usually packed in 25kg/drum, and also can be do customized package.
