

Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China Contact: +86-18653132120

Product name:Silicon monoxide

CAS:10097-28-6

Molecular Weight:44.09

Item	Specification
Boiling point	1880° C
Density	2.13 g/mL at 25 ° C (lit.)
Melting point	1870 ° C
flash point	1880° C
resistivity	1.9800
SOLUBLE	Insoluble in water.

Application:

Silicon monolithic powder is highly active and can be used as a raw material for the synthesis of fine ceramics, such as silicon nitride and silicon carbide fine ceramic powders. As a fine ceramic raw material, it has significant value. Silicon monolayer can also be evaporated in vacuum and coated as a protective film on metal mirrors used in optical instruments. It can also be used to manufacture semiconductor materials. Also used for optical glass.

Package:

Usually packed in 25kg/drum, and also can be do customized package.
