

Unilong Industry Co., Ltd

Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China
Contact: +86-18653132120

Product name: Titanium tetraisopropanolate

CAS: 546-68-9

Molecular Weight: 284.22

Item	Specification
Boiling point	232 °C(lit.)
Density	0.96 g/mL at 20 °C(lit.)
Melting point	14-17 °C(lit.)
flash point	72 °F
resistivity	n ₂₀ /D 1.464(lit.)
Storage conditions	Flammables area

Application:

Titanium tetraisopropanolate is a catalyst used in esterification reactions and transesterification reactions of esters such as acrylic acid. As a Ziegler Natta catalyst, it has high stereoselectivity in polymerization reactions such as epoxy resin, phenolic plastic, silicone resin, polybutadiene, etc. Crosslinking various polymers or resins in paint enhances the anti-corrosion ability of coatings and promotes adhesion between coatings and surfaces. It can be directly used as a material surface modifier and adhesive promoter.

Package:

Usually packed in 25kg/drum, and also can be do customized package.
