

Unilong Industry Co., Ltd

Add: No.2000 Shunhua Rd, High-Tech Zone , Jinan City, Shandong Province, China
Contact: +86-18653132120

Product name: Ethyl silicate

CAS: 11099-06-2

Molecular Weight: 106.15274

Item	Specification
Purity	99%
Boiling point	160°C [760mmHg]
MW	106.15274
Flash point	38°C
Vapor pressure	1.33hPa at 20°C
Density	0.96

Application:

Ethyl silicate can be used as an insulation material, coating, zinc powder coating adhesive, optical glass processing agent, coagulant, organic silicon solvent, and precision casting adhesive for the electronics industry. It can also be used to manufacture model boxes for metal investment casting methods; After complete hydrolysis of ethyl silicate, extremely fine silica powder is produced, which is used to manufacture fluorescent powder; Used for organic synthesis, preparation of soluble silicon, preparation and regeneration of catalysts; It is also used as a crosslinking agent and intermediate in the production of polydimethylsiloxane.

Package:

Usually packed in 25kg/drum, and also can be do customized package.
