Product name: Sodium glycolate

CAS: 2836-32-0

Molecular Weight: 98.03

ITEM	STANDARD
Appearance	White powder
Melting point	210-218°C
Content	≥97%

Application:

1. Sodium glycolate is used as organic synthesis intermediate;
2. Sodium glycolate is used as cosmetic and personal care products;
3. Sodium glycolate is used as Electroplating : as non-electrode plating buffer, as electroplating solution additives, also can use in electrolytic grinding, metal pickling, leather dyeing and tanning as the best green chemical raw materials.
4. Sodium glycolate is used as a pharmaceutical grade dissolution excipient for tablets and capsules. Sodium glycolate absorbs water rapidly, resulting in swelling which leads to rapid disintegration of tablets and granules. It is used as a disintegrant, a suspending agent and as a gelling agent. Without a disintegrant, tablets may not dissolve appropriately and may affect the amount of active ingredient absorbed, thereby decreasing effectiveness.
